

ANIL JANJAL

Full Stack Web and App Developer

+91 997-554-1769 ajjanjal2000@gmail.com <https://www.linkedin.com/in/anil> Pune, India

PROFESSIONAL SUMMARY

Full Stack Developer with almost 3 years of experience building scalable, performance-driven web and mobile applications using React.js, React Native, Next.js, and Node.js. Proficient in TypeScript, JavaScript, API integration (GraphQL and REST), Firebase, MongoDB, Redux, Tailwind CSS, HTML, CSS, Framer Motion, Jest, React Testing Library, Detox, CI/CD pipelines, GitHub, AWS, Vercel, Netlify, Figma, and WordPress. Focused on creating clean UI/UX, reusable components, bug fixing, performance optimization, and delivering real-world products in collaborative teams. Experienced in agile methodologies and deploying applications to production environments.

CAREER OBJECTIVE

Dynamic Full Stack Developer with nearly 3 years of experience seeking a challenging role to leverage expertise in React.js, Next.js, React Native, Node.js, and MERN stack technologies. Aiming to contribute to innovative projects by building scalable web and mobile applications, optimizing performance, and collaborating in agile environments to drive business growth and user satisfaction.

CAREER MILESTONES

- Successfully led the development of an inventory management system (SoftBuild), resulting in 30% improved efficiency for construction material tracking across multiple user roles
- Delivered a hospital management solution (MediMizer) that enhanced biomedical compliance and decision-making, supporting over 500 daily users in filtering detailed equipment data
- Optimized field service operations through FieldServio and FieldXpress apps, reducing response times by 25% via real-time updates and mobile integrations
- Contributed to e-commerce app (ShopSwift), increasing user engagement by 40% through seamless navigation and real-time features

PROFESSIONAL EXPERIENCE

- 01/2024 - Present

- Full Stack Web and App Developer
SoftPhase Technologies Private Limited
 - Developed responsive web and mobile interfaces using React.js, Next.js, React Native, Tailwind CSS, and HTML/CSS
 - Built reusable UI components, integrated GraphQL and REST APIs, fixed bugs, and optimized application performance for faster load times and better user experience
 - Collaborated with cross-functional teams in agile sprints to deliver scalable, clean, and user-focused interfaces
 - Implemented CI/CD pipelines using GitHub and AWS, reducing deployment time by 20%
 - Conducted unit and integration testing with Jest and Detox, ensuring 90%+ code coverage
- (November 2022 - December 2023)

- Trainee
Newton School
 - Completed full stack development bootcamp focused on modern web technologies including MERN stack.
 - Built multiple projects using React.js, Node.js, Express.js, and MongoDB, and deployed them on live servers via Vercel and Netlify.
 - Gained hands-on experience in API integration, state management with Redux, and performance tuning.
 - Participated in code reviews and collaborative projects, enhancing problem-solving skills.

PROJECTS

SoftBuild

Inventory Management System

- Developed a software solution for managing construction materials such as cement, sand, bricks, and related products using MERN stack
- Enabled construction companies, contractors, and suppliers to manage inventory, track material usage, and improve overall efficiency
- Implemented multiple user roles to ensure smooth operations, with features for real-time tracking and reporting
- Optimized database queries in MongoDB, resulting in 15% faster data retrieval

MediMizer

Hospital Management System

- Built a hospital management solution for biomedical compliance using React.js and Node.js.
- Supported customer support, parts tracking, and medical equipment management with advanced filtering for decision-making
- Integrated Firebase for real-time data synchronization and secure authentication
- Added analytics dashboards, improving data-driven decisions for healthcare providers

FieldServio

Field Service Management Tool

- Created a comprehensive tool for customer management, inventory control, mobile field operations, and financial reporting using React Native and Redux
- Facilitated end-to-end field service workflows, enhancing operational efficiency
- Deployed on AWS, ensuring high availability and scalability for enterprise users

PROJECTS

FieldXpress

Mobile Field Service App

- Developed a mobile app for field technicians to view tasks, update job status, and capture customer signatures using React Native, Redux, and Firebase
- Focused on responsive UI screens, smooth navigation, and real-time data display
- Incorporated push notifications and offline capabilities, boosting field productivity by 20%

ShopSwift

E-Commerce Mobile App

- Designed a mobile e-commerce app allowing users to browse products, manage shopping carts, place orders, and track delivery status using React Native
- Emphasized clean UI, smooth navigation, and real-time updates for a seamless shopping experience
- Integrated payment gateways and optimized for cross-platform performance on iOS and Android
