PROFESSIONAL SUMMARY

Full Stack Web & Mobile Application Developer with 3+ years of hands-on experience building scalable, production-ready web and cross-platform mobile applications. Proficient in Flutter, Dart, React Native, React.js, Next.js, Node.js, Firebase, and MongoDB. Currently building 4Gear — a live vehicle booking platform published on Google Play — as Technical Co-Founder at Akshanic Technologies. Skilled in REST API integration, state management (Redux, Riverpod), responsive UI development, CI/CD pipelines, and cloud deployments on Vercel and AWS. Delivered production applications across vehicle booking, travel, healthcare, field service, and e-commerce domains.

CAREER MILESTONES

- Built and published 4Gear — a live Flutter vehicle booking app on Google Play — handling full development, testing, and deployment
- Delivered scalable cross-platform mobile applications for Android and iOS using Flutter, React Native, and Dart across multiple production projects
- Developed production web platforms using React.js and Next.js across travel, healthcare, field service, vehicle booking, and e-commerce domains
- Improved application performance, responsiveness, and user experience across multiple production applications and real-world client projects

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, React Native, Android, Cross-Platform Development, Google Maps API

Frontend: React.js, Next.js, Tailwind CSS, Responsive UI Development, GSAP, JavaScript, TypeScript

Backend & APIs: Node.js, Express.js, REST APIs, Firebase, SSR (Next.js)

Databases: MongoDB, Firebase Realtime Database

State Management: Redux, Riverpod, Context API

Cloud & DevOps: AWS, Vercel, Netlify, Git, GitHub, CI/CD

Data & Visualization: Chart.js, Mapbox, Leaflet

Integrations: Stripe, Firebase Auth, Google Maps, Schema.org SEO, ShuftiPro

Tools: Postman, Figma

PROFESSIONAL EXPERIENCE

Full Stack Developer & Technical Co-Founder | Akshanic Technologies Private Limited (Pune) *July 2026 – Present*

- Lead hands-on product and technology development — architecting, building, and shipping web and mobile applications using Flutter, React.js, Next.js, Firebase, and REST APIs
- Built and published 4Gear on Google Play — a Flutter vehicle booking app supporting bike, auto, car, and pickup categories with full customer and partner workflows
- Develop and maintain the 4Gear web platform (Next.js / React.js) including booking flows, partner portals, fare estimation, and location-based features
- Designed and deployed the official Akshanic Technologies corporate website (akshanic.com) with responsive UI, SEO, and performance optimization
- Manage software projects end-to-end: planning, architecture, development, testing, debugging, CI/CD deployment, and team coordination

Frontend Developer | Cross-Platform | Buddy4Travel (Remote — Australia) *January 2026 – May 2026*

- Developed and maintained frontend components and user interfaces for Buddy4Travel web and mobile platforms using React.js, Next.js, and Tailwind CSS

- Built cross-platform mobile experiences for Android and iOS using React Native and Flutter
- Integrated REST APIs, authentication flows, and real-time features using Firebase to enhance application functionality
- Resolved UI issues, improved performance, and ensured cross-device compatibility across all screen sizes
- Collaborated with backend, design, and product teams in agile development workflows

Junior Software Engineer | **SoftPhase Technologies Private Limited (Hybrid — Pune)** *January 2024 – January 2026*

- Developed responsive web and mobile interfaces using React.js, Next.js, React Native, Tailwind CSS, and HTML/CSS
- Built dashboards, analytics modules, and real-time data interfaces with REST API and Firebase integration
- Integrated Stripe payments, Mapbox and Leaflet for interactive mapping, and Chart.js for data visualization
- Implemented CI/CD pipelines and deployed applications on AWS, Vercel, and Netlify for reliable production delivery
- Optimized SSR performance with Next.js and MongoDB query indexing, improving data retrieval speed by 15%
- Applied Schema.org structured data for SEO improvements and implemented multilingual support across platforms

Trainee | **Newton School, Bangalore (Remote)** *November 2022 – December 2023*

- Completed intensive full stack web development bootcamp focused on MERN stack technologies
- Built and deployed multiple projects using React.js, Node.js, Express.js, and MongoDB on Vercel and Netlify
- Gained hands-on experience in REST API integration, Redux state management, and frontend performance optimization

KEY PROJECTS

4Gear — Vehicle Booking Mobile App (Android) — *Flutter / Dart / Firebase / Google Maps API*

- Built and published a production Flutter Android app on Google Play supporting bike, auto, car, and pickup vehicle booking
- Implemented full customer workflow: vehicle selection, pickup/destination, fare estimation, booking confirmation, OTP start, ride completion, and payment
- Built partner workflow: registration, vehicle listing, document submission, admin verification, booking acceptance/rejection, and earnings
- Integrated Google Maps for live location tracking, route display, and geolocation-based fare estimation
- Implemented Firebase Auth for secure login, push notifications, and real-time booking status updates

4Gear — Vehicle Booking Web Platform — *Next.js / React.js / Tailwind CSS / REST APIs*

- Developed a production web platform for vehicle booking with customer and partner portals
- Implemented vehicle category selection, fare estimation, booking lifecycle management, and booking status tracking
- Built partner registration, vehicle listing, document submission, and admin verification workflows
- Integrated location/maps functionality, REST APIs, and responsive UI optimised for mobile and desktop

Akshanic Technologies — Corporate Website — *Next.js / React.js / Tailwind CSS*

- Developed the official Akshanic Technologies website (akshanic.com) for company products, platforms, and services
- Handled architecture, responsive frontend implementation, SEO optimization, deployment, and business enquiry functionality

Website (B4T) — Travel Platform — *Next.js / React.js / Tailwind CSS / Mapbox*

- Built responsive premium frontend with Tailwind CSS and GSAP animations for mobile and desktop
- Implemented multi-step flight booking, real-time tracking with Mapbox and Leaflet, and Chart.js analytics
- Integrated Stripe payments, ShuftiPro verification, Schema.org SEO, i18n, SSR, and code-splitting for performance

FieldXpress — Field Technician App (Android & iOS) — *React Native / Redux / Firebase*

- Built mobile app for field technicians with task management, job status updates, and customer signature capture
- Incorporated push notifications and offline capabilities using Firebase, boosting field technician productivity by 20%

MediMizer — Hospital Management System — *Next.js / Node.js / Firebase*

- Built SSR-based hospital management system with equipment tracking, parts management, and analytics dashboards
- Integrated Firebase for real-time data sync, secure authentication, and data-driven reporting for healthcare providers

SoftBuild — Inventory Management System — *MERN Stack*

- Built inventory management solution for construction materials with multi-user role support and real-time reporting

- Optimized MongoDB queries with indexing strategies, achieving 15% faster data retrieval

EDUCATION

Full Stack Web Development *2022 – 2023*
Newton School, Bangalore · Full-time Bootcamp · Remote

Bachelor of Science (B.Sc.) *2018 – 2021*
Dr. Babasaheb Ambedkar Marathwada University

CERTIFICATIONS

- Full Stack Web Development Certification — Newton School, Bangalore (2023)
